

Triangle Table
Product Fact Sheet

Triangle Table

The Triangle table is a versatile, modular system designed for quick and easy setup. Tables can be seamlessly attached using a secure connection clip mechanism, allowing you to create a wide range of configurations in minutes. Perfect for creating curves and corners.

With full-surface custom printing available, the Triangle table becomes a powerful branding tool ideal for showcasing your message at events, exhibitions, or retail spaces. Its clean, angular design offers a modern aesthetic, while the clever folding construction requires no glue, ensuring both speed and simplicity during assembly.

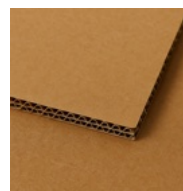

Crafted in your choice of white or raw cardboard, the Triangle table is both practical and visually striking. It pairs perfectly with the Block table and Block stool for a cohesive and functional setup.

Designer	Hanna Laikola
Material	Made from EB recycled cardboard
Country of production	Finland
Environment	Recommended for indoor use, but suitable for both indoor and outdoor. Designed to withstand a light shower or occasional moisture. Each table base comes equipped with a peg tab for outdoor use, allowing it to be securely fastened to the ground using biodegradable pegs - perfect for preventing it from blowing away in windy conditions.
Assembly	Flat packed in two parts – base and top. Assembly required. Assembly service available on request.
Finish	Every surface can be custom printed on to our standard white or natural brown cardboard
Durability	Our engineered cardboard is extremely strong and durable. The table base features a reinforced cross-section to support an even weight across the tabletop. However, the table is not designed to support the weight of a person. Sitting or standing on it, not recommended.
Sustainability	This product is proudly manufactured in Finland by our trusted and experienced local partner. We are committed to using only responsibly sourced materials - our suppliers meet strict sustainability standards and carry the FSC® certifications, ensuring the materials come from forests managed according to sustainable development principles.
